# Goal Now

# Menu Display

- 01** Browse all football matches from top leagues worldwide, organized by date with an easy day-by-day navigation bar.
- 02** Get real-time score updates, match timelines, and live commentary as goals, cards, and substitutions happen.
- 03** Follow league standings, fixtures, and stats to stay updated on your favorite team's season performance.

# Application Features

01

Live Scores — Real-time updates for matches across all major leagues, refreshed every minute.

02

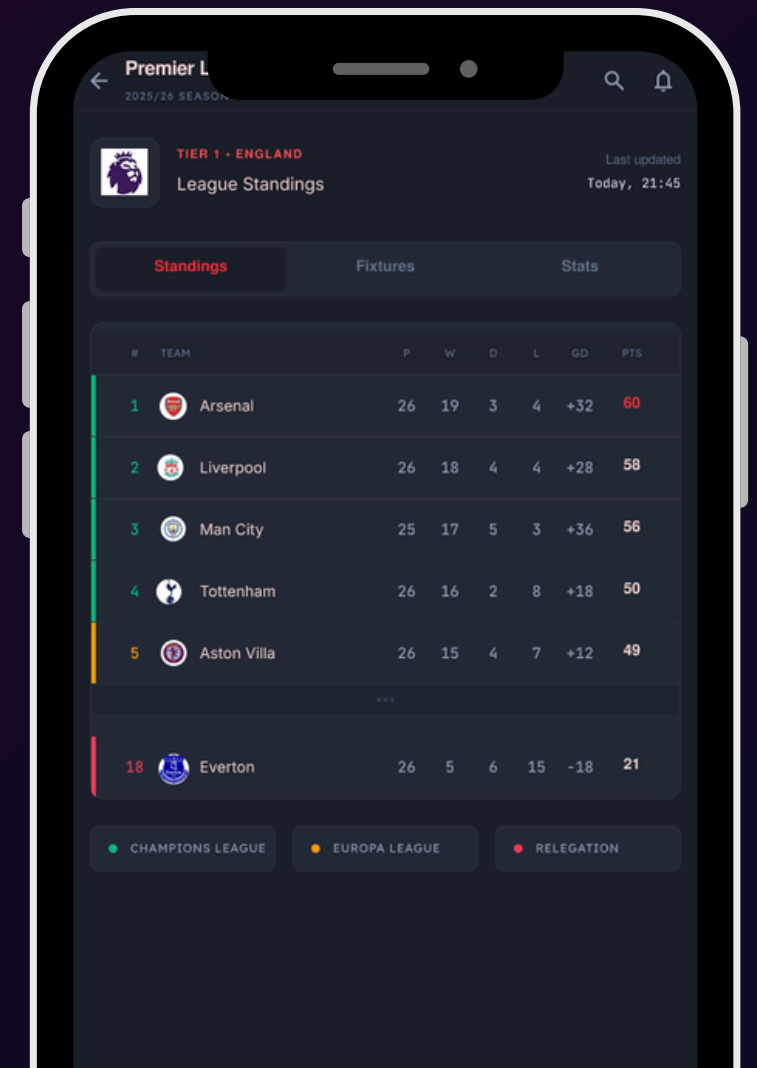

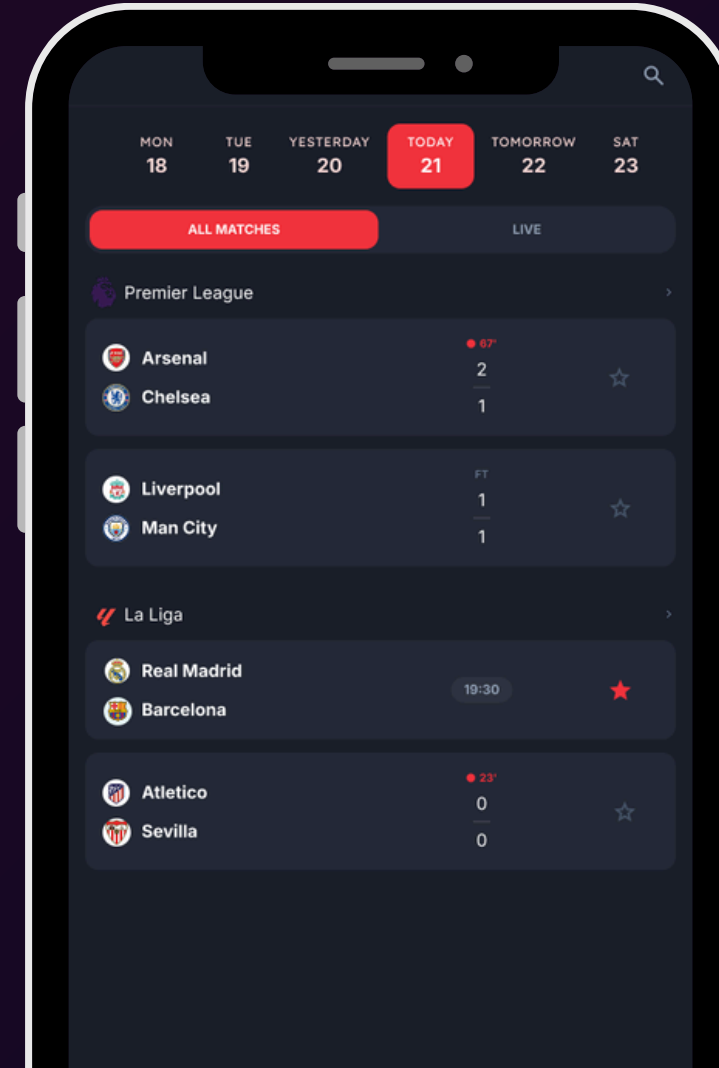

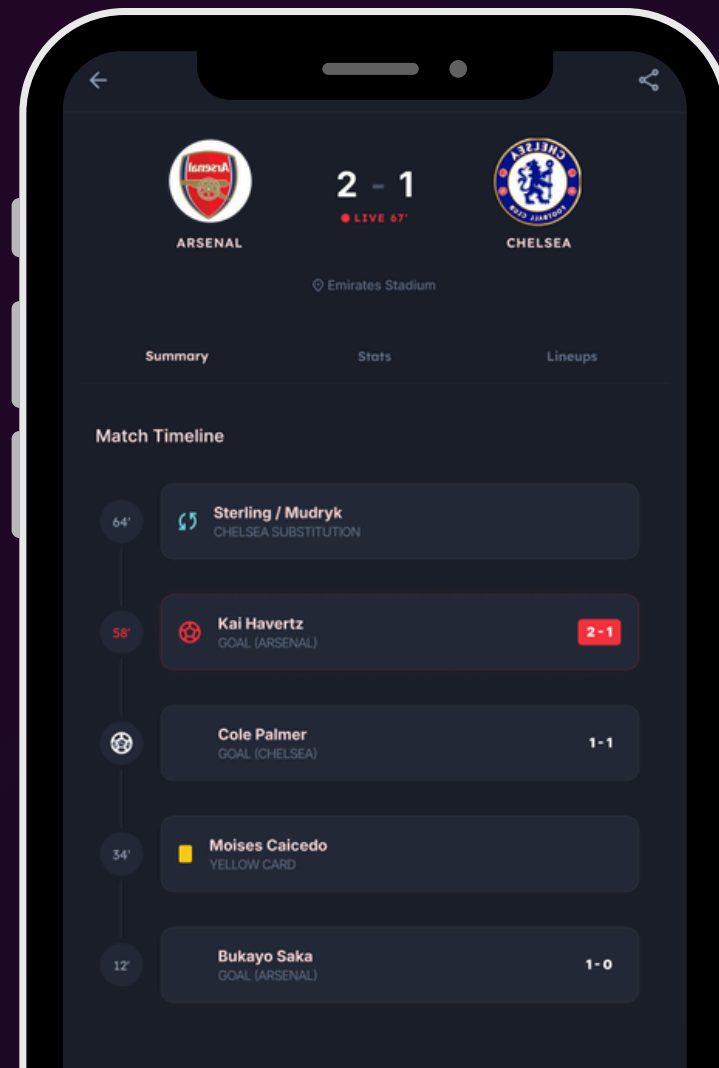

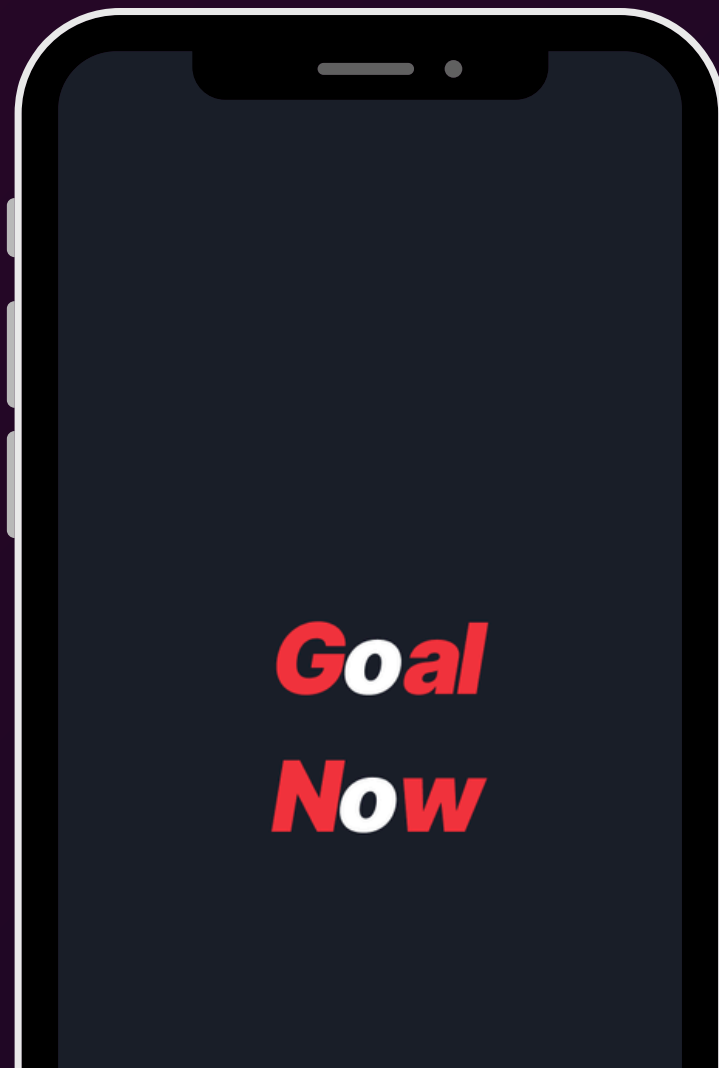

Match Details — In-depth summaries, stats, and lineups for every match.

03

League Standings — Full tables with points, goal difference, and qualification zones (Champions League, Europa League, Relegation).

04

Favorites & Alerts — Save your favorite teams and get instant notifications when they score.

The screenshot displays the Axure RP software interface for creating a mobile app prototype. The interface is divided into several sections:

- Left Sidebar:** Contains a file explorer with sections for "Pages" (Page 1), "Layers" (Onboarding 1, Main, Onboarding 2, Standings, Container, Top Navigation Shell, Main - Content Canvas, Today's Matches, BottomNavBar), and "Variables" (Text, Icon).
- Central Canvas:** Shows a flow diagram for "Flow 1" on an iPhone 17 device. The flow starts with a "Goal Now" screen, transitions to "All scores. One app.", and then to "Never miss a goal.". Below these are three mobile app screens: "Today's Matches", "Match Detail", and "Standings". Blue arrows indicate the navigation flow between these screens.
- Right Sidebar:** Includes a "Share" button, "Design" and "Prototype" tabs, and "Prototype settings" (iPhone 17, Lavender color, 000000 hex code). Below this is a "Flows" section with "Flow 1" listed. At the bottom, there are instructions for "Removing a connection" and "Running your prototype".
- Bottom Toolbar:** Contains various tool icons for selection, zooming, and editing.
